Sunlover Heating pool blankets are designed to deliver long life in an environment dominated by UV laden solar rays, chemicals and salt.

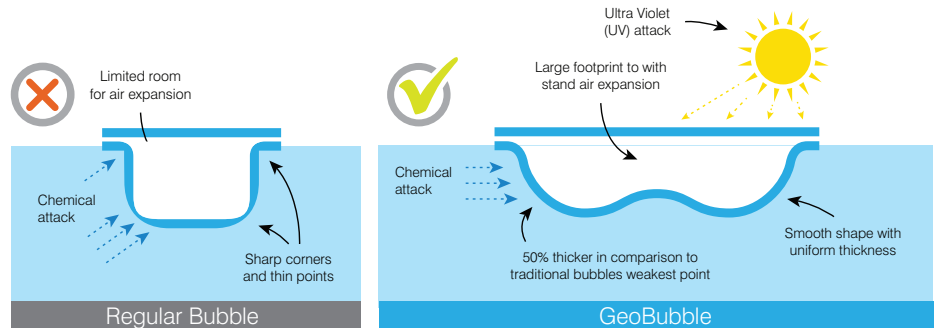

**MULTI AWARD
WINNERS**

Your pool heating Partner

NOT ALL BUBBLE SWIMMING POOL COVERS ARE THE SAME.

THE GEOBUBBLE TECHNOLOGY AND 'GUARD' MATERIALS HAVE BEEN DEVELOPED OVER THE PAST 5 YEARS.

- GeoBubble shape is stronger and will last longer against chemical and ultra violet (UV) attack.
- GeoBubble will save you money, time and reduce the carbon footprint of your pool.
- GeoBubble are available in a variety of standard colours.

GEOBUBBLE TECHNOLOGY...

... Scientifically designed to be more resistant to chemical and UV attack for longer than traditional shape bubble, and as a result its expected lifespan will increase by 25%. *

Eliminating weak and thin points gives you a stronger pool cover that can withstand chemical and ultra violet (UV) attack which leads to premature failure.

Research has gone into the use of the best additives, stabilisers, anti oxidant package and bubble design, with the aim to provide the best performing and longest lasting swimming pool bubble cover materials available.

**Provided pool water is kept within industry standard and UV Cover is used at all times.*

POOL ROLLERS PROTECT YOUR INVESTMENT

STORING YOUR POOL BLANKET ON A ROLLER MINIMISES THE POTENTIAL TO DAMAGE THE BUBBLE MATERIAL AND SAVES SPACE AND TIME.

KEY FEATURES

- Solid construction in white powder coated aluminium, the range is flexible and comprehensive.
- Long life is ensured by the use of UV and Ozone resistant engineering grade materials and strong roller tubes.
- There are stationary and mobile units available with a 320mm or 400mm high roller.
- Simple roller action
- Modern unobtrusive appearance
- Durable construction
- Tube is anodized and the aluminium frame is powder coated
- Lockable wheels (FM unit only), stops roller moving when the blanket is being rolled onto the pool
- UV Cover included
