Simple, strong design to keep your pool cleaner for longer.

A media filter is a one of the most popular filtration methods as it mimics nature's cleansing process. Removing dirt and debris from your system removes the food supply for algae and bacteria and keeps your pool looking its best.

A simple to operate multiport valve (MPV) gives you control over the direction of water and function you desire. The Oasis SFG Filter does not require regular maintenance. When needed, it's simple to perform a back wash. All models suitable for all filtration media, including sand, glass, beads or zeolite.

SFG Series Filter are equipped with:

- > 6-way clamp/bolt style multiport valve
- > Universal standard of union connection
- > Pressure gauge
- > Lateral system
- > Self sealing barrel unions
