Test, monitor and maintain the perfect sanitiser level and pH balance

In conjunction with the Oasis Smart Control System & CX Chlorinator, the Oasis SmartChem is designed to monitor and automatically adjust the pH and Chlorine (ORP) levels providing automation of water chemistry. Protect your family from skin irritations and red eyes, while safeguarding your pool and spa equipment.

The SmartChem will automatically dose pool acid (when its required) to maintain the set pH level once the pH and ORP levels are set in the Oasis Smart app. It will also maintain the systems ORP by either turning the chlorinator on or off as its required.

OASIS SMART APP CONTROL

Built in WiFi control with your iOS and Android smartphone. Control every aspect of your pool system.
